

Heavy Industrial

Solving Your Motion Control Challenges With Ingenuity

Evolution Motion Solutions is a leading engineering partner, systems integrator, and value-add distributor of advanced hydraulic, electromechanical, pneumatic, and automation technologies.

For over 80 years, our innovative solutions have been built on a foundation of technical excellence and industry-leading components designed for factory automation, heavy industrial, and mobile/off-highway applications.

We may not manufacture our customers' systems and machines, but we do help them run more efficiently and reliably by optimizing production time and enhancing performance.

Heavy Industrial

Evolution Motion Solutions Heavy Industrial encompasses everything required to design, build, maintain, and optimize hydraulic systems. We provide a wide array of value-added services that include locally-performed certified repairs and industry-leading hands-on training. With over 80 years of industry experience and technical expertise in hydraulics, electronics, drives, and controls, we inspire customers to do more than they ever thought possible.

Factory Automation

Evolution Motion Solutions provides integrated engineering solutions, expertise, and resources for automation, controls, pneumatic, electrical, hydraulic, sensing, joining, dispensing, and lubrication applications. With over 80 years of unparalleled experience in industrial product application, Evolution is your expert engineering partner for system and subsystem integration and value-added distribution, from initial concept and product to development and support.

Mobile/Off-Highway

Evolution Motion Solutions provides technical expertise and resources to supply integrated solutions for actuation, optimization, propulsion, and electrification technologies for mobile/off-highway applications. With unparalleled experience in mobile product application and value-added distribution, Evolution is your trusted engineering partner for system and subsystem integration, conceptualization, production, installation, and support.

One Team. Infinite Solutions.

Driven by a passion for innovative technology and conquering challenges, we develop solutions that keep our customers moving toward the future. From concept to completion, we provide exceptional customer service deeply rooted in our Commitment to Excellence.

- Solutions Based Engineering
- Design Engineering for Hydraulics, Pneumatics, Lubrication, & Mechanical Solutions
- Machine Control Design Experience
- Hardware & Software Design
- Concept & Process Engineering
- System Integration Solutions
- Subsystem Efficiency Solutions
- Modification of Machines to U.S. Standards & Specifications
- Quality Assurance According to AS 9100D and ISO 9001:2015
- Designs & Capabilities According to U.S. & European Standards NFPA, UL, CE

Elements of Success

From our beginnings as a trusted resource for premier components, we have evolved into Evolution Motion Solutions, an engineering partner, systems integrator, and value-add distributor (ESV).

As the world's first ESV, we provide our customers with highly engineered solutions for motion control tasks. By leveraging our group members' diverse industry experience and product knowledge, we engineer technically superior solutions with sustainable value.

We function as an extension of your engineering team. By delivering tailored solutions that address your specific needs, whether concept engineering, system expertise, or R&D, we ensure success and innovation at every step.

- Application Engineering
- Custom Products & Solutions Designs
- 3D Modeling & FEA Analysis
- Application & Technical Support
- Product & Machine Expertise
- Research & Development
- Product Launch Support

Our engineering expertise extends to integrating new and legacy systems, optimizing them for improved performance, reliability, and longevity by delivering application assistance, subsystem aggregates, and complete system solutions.

- Application Assistance
- Configured Assemblies
- Product Sizing & Selection
- Integrated Products
- Custom System Design & Manufacturing
- Subsystem Aggregates
- Complete System Solutions

We go beyond traditional distribution by offering value-added services such as 24/7 support, product kitting, and inventory management. We provide high-quality components and solutions that meet your needs—every time.

- 24/7 Support
- Customer Service
- Factory Trained Repair Technicians
- Inventory Management
- Configured Assemblies
- Product Kitting
- Product Support
- Service Technicians
- Training
- Advanced Product Training

Fluid Power

Evolution Motion Solutions' extensive range of hydraulic products provides the fluid power necessary to unlock the potential of hydraulics in your industrial applications. From hydraulic cylinders and pumps to valves and motors, we offer top-quality components for any fluid power need.

Electronics, Drives, & Controls Products

Evolution Motion Solutions employs a flexible design concept for its controls systems. Designs range from small, compact, all-in-one drive systems to large modular systems to panel-free technology. These products provide exceptional diagnostic capabilities, including Industry 4.0 solutions. Our safety product offering is the broadest in the industry and provides flexible software solutions.

Filtration

We offer advanced filtration solutions specifically engineered to withstand the harsh conditions of heavy industrial environments. Our systems are designed to protect equipment, reduce downtime, and improve operational efficiency by removing contaminants that can compromise performance and safety. Whether you're looking to extend the life of your hydraulic systems, protect sensitive components, or ensure clean and safe operating environments, our robust filtration solutions deliver the performance you need.

Hydraulic Hands-On Training

Evolution Motion Solutions is a nationally recognized leader in fluid power training, with over 80 years of training experience featuring our own fluid power textbooks and our custom-built trainers. Our many years of training experience and recognized textbooks uniquely qualify us to host these in-depth, 3-day and 4-day hands-on training seminars and in-plant custom courses that cover the most up-to-date topics, technologies, and techniques. These hands-on training courses teach and guide attendees to quickly identify and troubleshoot hydraulic equipment, skills that can significantly reduce system downtime.

- Basic Hydraulic Principles**
- Hydraulic Pressure Control**
- Hydraulic Cylinder Principles**
- Filtration Basics**
- Troubleshooting Principles**
- Load Control**
- Directional Control of Cylinders and Motors**
- Pump Cavitation Basics**
- Sequence Valves**
- Hydraulic Motor Principles**
- Pressure Compensated Pump Basics**
- Pump Unloading**
- Over 15 Hands-On Exercises**
- Reading and Understanding Schematic Symbols**

Service and Repair

Evolution Motion Solutions provides certified hydraulic pump and motor repairs performed locally by highly trained, certified repair technicians. With AS 9100D and ISO 9001:2015 certifications, the company adheres to the highest quality management standards to ensure precision and reliability in every repair. Utilizing advanced testing equipment, each component is thoroughly inspected, tested, and backed by a comprehensive warranty, guaranteeing it meets or exceeds customer expectations. By offering local repair services for Bosch Rexroth pumps and motors with an industry-leading, two-year warranty, Evolution ensures faster turnaround times, reduced downtime, and long-term, efficient performance for customer operations.
